### COMPONENTS

— Page 2 —

### OPERATION

- Place the diffuser correctly on a flat surface, remove the glass cover and the in-cover from the main body.
- Fill water tank with water, no higher than the maximum water level line (100ml). Add 2-3 drops of essential oils into the water tank. Essential oil can be more or less according to personal preference.
- Replace the in-cover and the glass cover to the original position of the main body. Plug adapter into USB slot of computer or Plug the AC adapter into the power socket.
- Press button to turn on the device and set as follows:  
 Press button first time to turn on and start mist continuously  
 Press button second time to turn off and stop mist  
 Press button third time to turn off and stop mist
- Press button to turn on the LED illumination and set LED mode:  
 • Diffuser comes with different LED lights to provide ambience that suits you.
- When the diffuser detects water is below the minimum threshold, the device will automatically enter standby mode. To reactivate repeat steps 1-6

— Page 3 —

### CLEANING & MAINTAINANCE

- Unplug unit and pour out remaining water.
- Use soft cloth with water to clean the main body and outer shell lightly.
- After cleaning place in ventilated area to dry.
- Disinfect with cotton swab dipped in alcohol and clean the dirt of the ultrasonic plate gently (picture A).
- Replace the cover of the aroma diffuser (picture B).
- Store in cool dry place.

**NOTE:**

- Do not use acid or alkaline or other strong cleaning agents on unit. May cause damage or discolouration.
- Change water daily. Do not use mineral water or water temperature above 15-40°C in unit.
